

Work Experience

React Native Developer FullStack Developer - hybrid	3E-TECH Beirut, Lebanon	JAN 2025 – Present
• Marketplace App (Dealsy): Built a high-traffic Expo application featuring real-time chat via Socket.io and targeted engagement using EAS Notifications. • Healthcare Platform (ChatsRX): Developed a secure React Native CLI app for doctor-pharmacy interaction; implemented prescription workflows, status tracking, and automated email triggers. • Security & Cloud: Architected a document verification system using AWS S3 presigned urls for secure storage, ensuring data confidentiality for medical professionals. • Full-Stack POS: Developing an Electron/React POS system with TanStack Query, TanStack Router ensuring role based routing (frontend) and Node/Prisma/PostgreSQL (backend) for seamless data handling. • Methodology: Worked in Agile/Scrum environment with sprint planning, task estimation, and iterative releases. • Optimization: Applied lazy loading and memoization achieving 35% faster navigation transitions.		
Junior React Developer Frontend Developer - onsite	KeyInHands Baalback, Lebanon	APR 2024 – DEC 2024
• Developed a University Management System dashboard using React, Redux-Saga, and SQL procedures. • Designed responsive UI templates using React Bootstrap, ensuring cross-browser compatibility. • Built a mobile agenda application using React Native, Node.js, and MySQL. • Collaborated on database schema design and implemented memoization to minimize re-renders.
